

# Vinyl Flooring Accessories Maintenance

## 1. Initial Maintenance

- Allow 48 hours after installation for proper curing of the adhesives
- Remove any coverings used for floor protection after installation prior to cleaning
- Sweep, dust mop and/or vacuum floor to remove any dirt or particulates accumulated on the floor
- Wipe the Vinyl Flooring Accessories with a mild solution of Neutral pH cleaner such as Spartan Clean by Peroxy, Spartan Green Solutions All Purpose Cleaner, Spartan Damp Mop, Taski Profi or equivalent
- Do not use detergents, abrasive cleaners or “mop and shine” products as they will dull the look of the floor
- Do not use vacuums with a beater bar or electric brooms with hard plastic bottoms and no padding as this may cause discoloration, scratching and loss of gloss

## 2. Daily Maintenance

- Sweep, dust mop and/or vacuum floor to remove any dirt or particulates accumulated on the floor
- Remove any spills or other large deposits of dirt and / or debris

## 3. Floor Protection Devices

- When moving in appliances or heavy furniture, it is always wise to protect the accessories from scuffing and tears by using something to protect the floor
- Use floor protectors under furniture or fixtures to reduce indentation; as a rule of thumb, the heavier the item the wider the floor protection device needed
- Place walk-off mats at outside entrances manufactured with non-staining backs to prevent discoloration
